Stainless Steel Finger Trap

Finger Traction Device

Rx Only

REF: K3278, K3280, K3285, K3290

How to Use: Place patient's fingers in finger traps. If using stainless steel trape, fingers may be wrapped in sterile dressing or 3M Coban to prevent unnecessary skin trauma. Once fingers are secure in traps, place the loop of the finger trap in the appropriate clip on ISI's Digi-Grip or other traction device. The traction device may be suspended from an IV pole or traction system.

You may also use ISI's Digi-Grip, Traction Strap and weight set for additional patient stability.

DG-3000 Digi-Grip
DG-7550 Digi-Grip System
WS1820 Traction Strap
S Hook Stainless Steel S Hook
0350 ½ pound (0.22 Kilogram) weight
0352 1 ½ pound (0.68 Kilogram) weight
0354 2 ½ pound (1.13 Kilogram) weight
0357 5 pound (2.27 Kilogram) weight

Sterilization Recommendations: Clean with any standard disinfectant prior to sterilization.

1. Steam Sterilization General Instructions
   Follow standard hospital sterilization practices.
   A. Place Clean Finger Traps in an instrument tray.
   B. Follow the instructions below for recommended sterilization processes.

2. Pre-Vacuum Steam Sterilization
   A. Place Finger Traps in a CSR wrap prior to sterilization.
   B. Set temperature to 132 degrees Celsius.
   C. Set exposure time for 4 minutes.

IFU - 003 SS Finger Trap Page 1 of 2 Rev: A

3. Gravity Steam Sterilization
   A. Place Finger Traps (unwrapped) into instrument tray.
   B. Set temperature to 132 degrees Celsius.
   C. Set exposure time for 4 minutes.

After cleaning, store in accordance with standard hospital operating procedures to maintain cleanliness. Inspect Finger Trap before and after each use.

If the Finger Trap is split or frayed, DO NOT USE. Handle and dispose of in accordance with accepted medical practice and applicable laws and regulations.
