Nylon Finger Trap
Finger Traction Device
Rx Only

How to Use: Place patient's fingers in finger traps. Once fingers are secure in traps, place the loop of the finger trap in the appropriate clip on ISI's Digi Grip or other traction device. The traction device may be suspended from an IV pole or traction system.

You may also use ISI’s Digi Grip, Traction Strap and weight set for additional patient stability.

DG-3000 Digi Grip
DG-7550 Digi Grip System
WS1820 Traction Strap
S Hook Stainless Steel S Hook
0330 ½ pound (.23 Kilogram) weight
0332 1 ½ pound (.69 Kilogram) weight
0334 2 ½ pound (1.13 Kilogram) weight
0337 5 pound (2.27 Kilogram) weight

Sterilization instructions: Clean with any standard disinfectant prior to sterilization.

1. Steam Sterilization General Instructions:
   Follow standard hospital sterilization practices
   A. Place clean instruments in an instrument tray
   B. If instruments are to be wrapped, two double thicknesses of #140 thread count wrappers should be utilized. Exposure times are the same for wrapped or unwrapped instruments
   C. Follow the instructions for the gravity air displacement steam sterilization listed below

IFU – 028 Nylon Finger Trap
Page 1 of 2
Revision: A

2. Gravity Steam Sterilization:
   A. Double wrap in standard central supply wrap.
   B. Set the temperature and corresponding exposure time:
      121-123 degrees Celsius for 30 minutes

After cleaning, store in accordance with standard hospital operating procedures to maintain cleanliness. Inspect finger trap before and after each use.

If the Finger Trap is split or frayed, DO NOT USE. Handle and dispose of in accordance with accepted medical practice and applicable laws and regulations.
